MATHEMATICS

POSITION: Teacher of Mathematics

JOB DESCRIPTION: This individual’s primary teaching responsibility will include a variety of levels of secondary mathematics within a program beginning at the Algebra I level and continuing through Vector Calculus. Additional responsibilities will likely include teaching Statistics and term electives such as History of Mathematics and Probability. In particular, St. Paul’s seeks a teacher who is willing and able to teach higher level courses beyond Calculus including Linear Algebra, Number Theory, and Abstract Algebra. The successful candidate will have college mathematics coursework and prior teaching experience.

Education: Masters Degree (or higher) preferred in Mathematics

Experience: Two or more years teaching Mathematics at the secondary level. Ability to teach all levels of Mathematics. Experience in using technology, particularly the graphing calculator, to enhance the learning of Mathematics. Also, familiarity with Blackboard and Geometer’s Sketchpad is helpful. Lively interest in current pedagogy and scholarship.
